Weight Limits: 2 Rollers (220)
Track Length: Up to 20' Long.
Glass Thickness: 3/8", 1/2" tempered glass.
Panel Limits: Max Width: 54", Max Height: 99"
Available Glass Color: Clear, Bronze, Starphire, Texture.
Available Finishes: #4 Brushed Stainless Steel (US32D), #8 Polished Stainless Steel (US32)
Lock Option: Patch Lock or Locking Ladder Pulls
Handle Option: Standard C pull, Ladder Pull, Locking Ladder pull, tiffany finger pull, offset pull
PRL’s Ruby Interior Sliding System is a contemporary top hung stainless steel sliding door system that offers a smooth and easy operation. Our Ruby slider uses compact exposed components with surface flush mount fasteners that provide a unique look. The support track can be up to 20’ long, it is secured with offset mount brackets on glass and with adaptors can be wall or glass mounted. Each system requires the use of track mounted door stops in both the open and closed positions. The number of rollers depends on the weight; 2 rollers hold up to 220 pounds. The glass stays in-line with a bottom guide. The frameless design and transparency of this system creates visually roomier spaces while providing a means for privacy.

SINGLE SLIDING DOOR PACKAGE:
- 6 ft track
- 2 Rollers
- 1 Bottom guide
- 1 Finger Pull
- 2 End-caps
- 2 Door Stops

*Manually modify the three types of tracks and track length if needed
WALL MOUNT SLIDER APPLICATIONS

PRL’s Wall Mount Ruby sliding doors provide a modern look for an all glass interior application. This wall brackets are easy to install which add value through its durability and ease of use. Mounting to the wall creates a clean and sophisticated look. Glass panels slide and tuck away easily to free up space with simple, smooth operation. Each system requires the use of track mounted door stops in both the open and closed positions. Use your space efficiently and show off interiors with wall mount Ruby all glass sliders.

GLASS MOUNT SLIDER APPLICATIONS

Our interior top hung Ruby sliding door system boasts uninterrupted all-glass views. The track is surface mounted to the tempered glass, through the glass sidelights and transom. Each system requires the use of track mounted door stops in both open and closed positions. In applications that have transoms it is important to note the transom lite must be mechanically fastened to the ceiling for adequate support. PRL is able to provide a 1-3/8 x 2-5/8” pinning channel which is typically run the length of the entire opening, however only the transom lite will require pinning.

- Single/Multiple Doors
- Glass Mount bracket
- Door Stop
- S/L head channel
- Transom head channel

All Glass Ruby Sliders with Short Easy Locking Ladder Pulls
GLASS OPTIONS

The Ruby slider system is designed to accept either 3/8” or 1/2” monolithic or tempered glass. You can select from our rich assortment of colored and textured glass to add your own personal touch.

If using 3/8” tempered glass, PRL recommends that your opening size does not exceed 84” due to deflection concerns and only on openings where there are not transoms or sidelights.
FINISH OPTIONS

Offered in attractive brushed and polished stainless steel finishes, Ruby interior all glass sliding doors accentuate commercial and residential entrances brilliantly. Ideal for hotel gift shops, office areas, pantries, kitchen or dining rooms, the Ruby is a great way to display interior spaces while dividing them.

Brushed Stainless Steel

Polished Stainless Steel
LOCKING OPTIONS

When locks on Ruby sliders are required we must know at time of bid to assess the overall opening widths and what type of lock would best suit your applications needs and budget.

The most common type of lock would be a smaller euro type that would fit onto the bottom leading edge to the corner of the slider and strike into the floor.

For single door applications, a center lock housing equipped with a hook type bolt to strike into a custom jamb is available. The client may also decide to go with a floor striking locking ladder pull as well. In any lock application we must review each opening width since adding a lock will limit the overall clear opening when door slides open to its maximum.

PULLS

Ruby slider systems can use a variety of handles however it is ideally recommended to use a flush type handle such as the sliding door finger pull which will not protrude far from the face of glass to allow the sliding panel to completely slide behind the adjacent sidelight or wall. When ladder or other straight pull styles are used we simply recommend slightly widening your door opening width once considering the pulls projection and location on the door to ensure local clear opening codes are adhered to.

Top Hung All Glass Tiffany Slider

At PRL Glass we strive to fabricate quality, effective, innovative products unmatched by our competitors. By designing our Interior All-Glass Top Hung Sliding Door Systems we've fabricated the ideal solution where space and budgets are limited; Our Tiffany All-Glass Top Hung Interior Sliding Door Systems.

Featuring an effortless, floating effect Tiffany creates an illusion of spaciousness using minimal hardware and framing obstruction that will intrigue and captivate. Crafted with minimal top hung tracks PRL has solved the problem of limited head space.

Sleek, chic, and luminous in design the Tiffany was constructed to accommodate standard and narrow width entrances. Available for residential or commercial all-glass entryways PRL offers single, double or bypass interior all-glass sliding doors.

Tiffany All Glass Slider with Custom Pull

Office Tiffany Slider with Center Locking Housing and Custom Pull
TIFFANY ALL GLASS SLIDER - Components

The heavy-duty Petite Track accommodates limited, narrow, entrances making the Tiffany the perfect solution for limited head space! Using only two small suspension points our sliding all-glass doors slide seamlessly and effortlessly with our two 2-3/8" diameter rollers enhance the all-glass system.

The Tiffany is typically ceiling mounted, however with a modified heavy duty track option it can be fascia mounted it as well. Another advantage is the slotted holes required in the glass to mount the Tiffany roller insures your panels will not slip in time with usage as other pressure fit types. The glass stays in-line with a bottom guide. We also offer inset metal finger pulls, simple polished holes, or your choice of any all-glass door hardware compatible with our Tiffany System. Our Ladder style handles add a popular, upscale, polished design to the sliding glass door system.
SINGLE SLIDING DOOR PACKAGE:

- 6ft track *
- 1 Bottom guide
- 2 End caps
- 2 Rollers
- 1 Finger pull
- 2 Door stops

*Manually modify the three types of tracks and track length if needed.
TIFFANY ALL GLASS SLIDER - Applications

Multiple Office All Glass Tiffany Sliders with Ladder Pulls

Tiffany Slider Systems with Ladder Pulls
PRL can supply the Tiffany tracks in nearly any finish required. They are typically clad in stainless steel to match the rollers however they can be Anodized or Powder coated as well to suit your design needs. There are 2 standard track profiles. We carry the 1-3/8 x 1-5/8 single track (SHPST) for applications with doors only, whether it be a single or pair. We also carry a 2-3/8" x 1-5/8 track (SHPDT) which has a reglet for wet glazing siedelles into your system. Each application is looked at custom and we can run tracks full width of elevation for an even head sightline or we can offer the single track at door opening and sliding area only, with end caps of course, for less metal look.

If the client is wanting to surface mount the track directly to the face of the wall a special track (PLTTTFT) will need to be used. Please note for this application, it is the glazers responsibility to ensure adequate support in the wall to withstand the weights.

INSULATED GLASS
Total Energy Performance Product that Translates into Reduced Energy Cost and Increased Comfort

PRL IG Units are a high quality, total energy performance product that translates into reduced energy cost and increased comfort. Insulated glass helps maintain inside room temperatures while saving energy.

IG Unit line capabilities
- Max. sizes 98” x 137”
- Min. size 6” x 6”
- Lead-times are 2 to 3 working days
- 24-hour service available upon request the fastest leadtime
- Thickness from 1/2” to 1 1/2”

TEMPERED GLASS
Unlimited Glass Applications

Tempered glass is always much more resistant to breakage than raw glass. Even if it breaks, the glass disintegrates into relatively small pieces, which is less likely to cause a serious injury. It is very common for glass doors, sidelites, balconies, etc.

Oversize tempered glass available
110” x 189”
