#### COMPONENTS

PRL's Ruby Interior Sliding System is a contemporary top hung stainless steel sliding door system that offers a smooth and easy operation. Our Ruby slider uses compact exposed components with surface flush mount fasteners that provide a unique look. The support track can be up tp 20' long, it is secured with offset mount brackets on glass and with adaptors can be wall or glass mounted. Each system requires the use of track mounted door stops in both the open and closed positions. The number of rollers depends on the weight; 2 rollers hold up to 220 pounds. The glass stays in-line with a bottom guide. The frameless design and transparency of this system creates visually roomier spaces while providing a means for privacy.

#### SINGLE SLIDING DOOR PACKAGE:

- 6 ft track\*
- 1 Bottom guide
- · 2 End-caps

- 2 Rollers
- 1 Finger Pull
- · 2 Door Stops
- \*Manually modify the three types of tracks and track length if needed

#### WALL MOUNT SLIDER APPLICATIONS

PRL's Wall Mount Ruby sliding doors provide a modern look for an all glass interior application. This wall brackets are easy to install which add value through its durability and ease of use. Mounting to the wall creates a clean and sophisticated look. Glass panels slide and tuck away easily to free up space with simple, smooth operation. Each system requires the use of track mounted door stops in both the open and closed positions. Use your space efficiently and show off interiors with wall mount Ruby all glass sliders

#### **GLASS MOUNT SLIDER APPLICATIONS**

Our interior top hung Ruby sliding door system boasts uninterrupted all-glass views. The track is surface mounted to the tempered glass, through the glass sidelights and transom. Each system requires the use of track mounted door stops in both open and closed positions. In applications that have transoms it is important to note the transom lite must be mechanically fastened to the ceiling for adequate support. PRL is able to provide a 1-3/8 x 2-5/8" pinning channel which is typically run the length of the entire opening, however only the transom lite will require pinning.

### **RUBY ALL GLASS SLIDER- Glass Options**

Wall Mount Ruby Slider System with Acid Etch Glass

#### **GLASS OPTIONS**

The Ruby slider system is designed to accept either 3/8" or 1/2" monolithic or tempered glass. You can select from our rich assortment of colored and textured glass to add your own personal touch.

If using 3/8" tempered glass, PRL recommends that your opening size does not exceed 84" due to deflection concerns and only on openings where there are not transoms or sidelights.

#### TIFFANY ALL GLASS SLIDER- Features

Custom Office Glass Wall with Tiffany Slider System

#### Top Hung All Glass Tiffany Slider

At PRL Glass we strive to fabricate quality, effective, innovative products unmatched by our competitors. By designing our Interior All-Glass Top Hung Sliding Door Systems we've fabricated the ideal solution where space and budgets are limited; Our Tiffany All-Glass Top Hung Interior Sliding Door Systems.

Featuring an effortless, floating effect Tiffany creates an illusion of spaciousness using minimal hardware and framing obstruction that will intrigue and captivate. Crafted with minimal top hung tracks PRL has solved the problem of limited head space.

Sleek, chic, and luminous in design the Tiffany was constructed to accommodate standard and narrow width entrances. Available for residential or commercial all-glass entryways PRL offers single, double or bypass interior all-glass sliding doors.

### **TIFFANY ALL GLASS SLIDER-** Components

#### COMPONENTS

The heavy-duty Petite Track accommodates limited, narrow, entrances making the tiffany the perfect solution for limited head space! Using only two small suspension points our sliding all-glass doors slide seamlessly and effortlessly with our two 2-3/8" diameter rollers enhance the all-glass system.

The Tiffany is typically ceiling mounted, however with a modified heavy duty track option it can be fascia mounted it as well. Another advantage is the slotted holes required in the glass to mount the Tiffany roller insures your panels will not slip in time with usage as other pressure fit types. The glass stays in-line with a bottom guide. We also offer inset metal finger pulls, simple polished holes, or your choice of any all-glass door hardware compatible with our Tiffany System. Our Ladder style handles add a popular, upscale, polished design to the sliding glass door system.

### **TIFFANY ALL GLASS SLIDER-** Tracks

#### **TRACKS**

PRL can supply the Tiffany tracks in nearly any finish required. They are typically clad in stainless steel to match the rollers however they can be Anodized or Powder coated as well to suit your design needs. There are 2 standard track profiles. We carry the 1-3/8 x 1-5/8 single track(SHPST) for applications with doors only, whether it be a single or pair. We also carry a 2-3/8" x 1-5/8 track(SHPDT) which has a reglet for wet glazing sidelites into your system. Each application is looked at custom and we can run tracks full width of elevation for an even head sightline or we can offer the single track at door opening and sliding area only, with end caps of course, for less metal look.

If the client is wanting to surface mount the track directly to the face of the wall a special track(PLTTTFT) will need to be used. Please note for this application, it is the glaziers responsibility to ensure adequate support in the wall to withstand the weights.

- Min. size 6" x 6"
- · Lead-times are 2 to 3 working days
- 24-hour service available upon request the fastest leadtimes
- Thickness from 1/2" to 1 1/2 "

Curtainwall with Atlantica Glass IG Units

#### TEMPERED GLASS

Unlimited Glass Applications

Tempered glass is always much more resistant to breakage than raw glass. Even if it breaks, the glass disintegrates into relatively small pieces, which is less likely to cause a serious injury. It is very common for glass doors, sidelites, balconies, etc.

#### Oversize tempered glass available 110" x 189"

\*consult PRL for details.
